

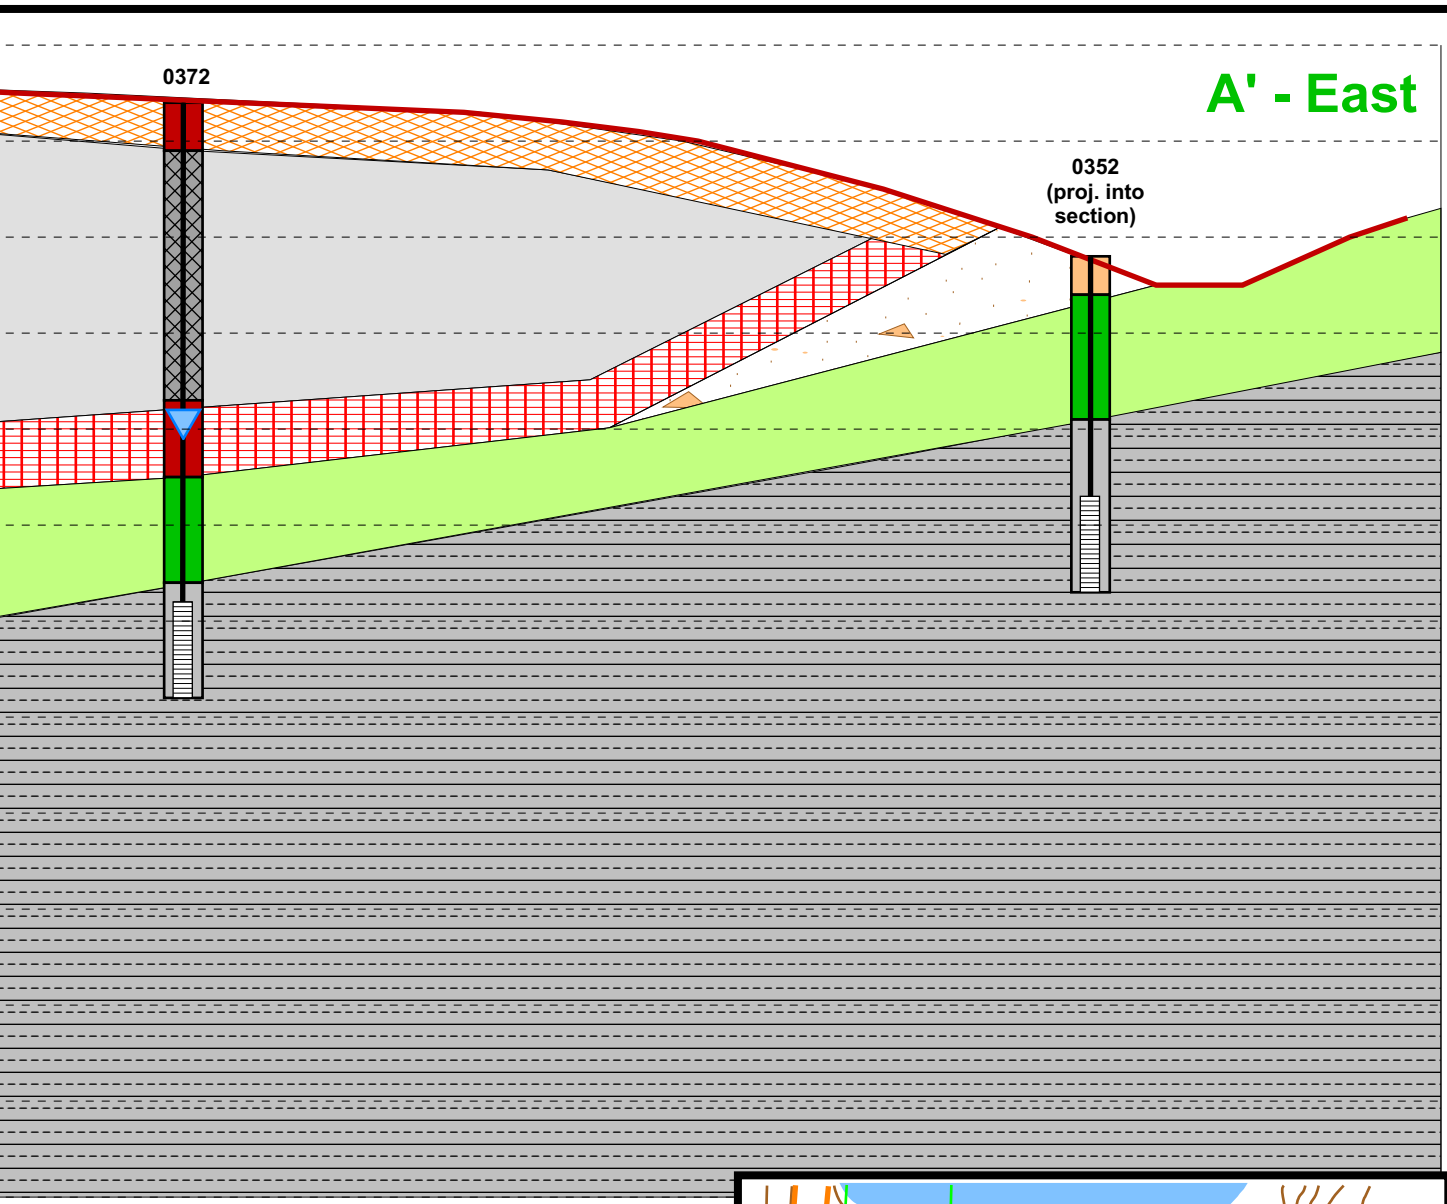
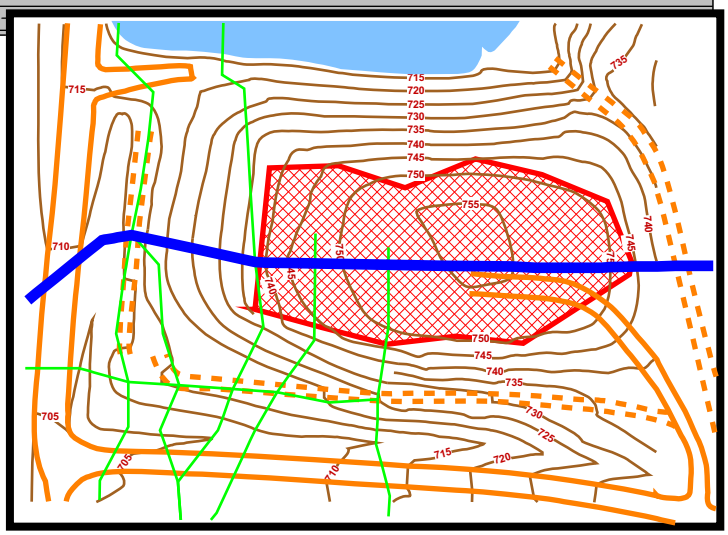
Buried Metal detected by downhole geophysics

Radioactivity detected by downhole geophysics

Solvent contamination detected by subsurface sampling (vadose zone only, > 1,000 ppb total)

12 / 113 PCE / TCE concentrations, in ppb samples from below water table only





Cross Section A-A'
OU-1, Mound Facility

Horizontal Scale 1' = 20'
vertical scale 1' = 20'
