If an Offeror proposes exceptions to the terms and conditions of the solicitation, DOE may make an award to another Offeror that did not take exceptions and/or deviations to the terms and conditions of this solicitation.

- (4) Recognition of Performing Entity. Offerors shall designate all entities that are proposed to perform work under the contract that are a part of the proposal upon which any contract award would be based. ## **L.20 Proposal Preparation Instructions - Technical Proposal - Volume II**

The Technical Proposal consists of written information intended to present the Offeror's ability to satisfy the requirements of the PWS. Awards may be made to a single and/or multiple Offeror(s) for each CLIN on the basis of best value to the government, i.e. the lowest evaluated price(s) of the proposals meeting or exceeding acceptability criteria for all non-cost criteria for the CLIN(s) proposed. An Offeror may be awarded a contract with a single CLIN, multiple CLIN(s) or all CLIN(s).

In order to be considered technically acceptable, an Offerors technical proposal must pass all technical criteria listed below, and failure to meet any one criterion shall deem the entire proposal as technically unacceptable.

An evaluation will be performed in accordance with Section M.5 to determine the Offeror's ability to perform the requirements as specified in the RFP. If an Offeror does not meet or exceed all of the non-cost criteria, an award will not be made to that Offeror.

There are not any page limitations for Volume II. No price/cost information shall be included in the Technical Proposal – Volume II.

The format and content of Volume II, Technical Proposal, shall consist of the following:

**(1) Criterion 1 – Applicable Licenses, Permits or Authorizations**

The Offeror shall provide copies of the applicable granted or issued licenses, permits or authorizations with the appropriate regulatory authority for the CLIN(s) proposed to receive and permanently dispose of the waste. The licenses and permits shall be current, dated, signed and approved. For each CLIN, the Offeror shall clearly specify where in the document (page, section, paragraph) that the specific waste for the CLIN is identified and authorized for receipt and permanent disposal. Wherever practicable, the Offeror can avoid unnecessary duplication/redundancy, e.g., if all CLIN(s) proposed on are included in a single license, permit or authorization, the Offeror should simply provide a single copy of the current, dated, signed and approved license, and reference the applicable section in the license, permit or authorization where each radioactive waste is identified and authorized for permanent disposal. However, it is the Offerors responsibility to demonstrate they have the applicable licenses, permits and/or authorizations.

**(2) Criterion 2 – Operating Disposal Facility**

The Offeror shall provide documentation from the appropriate regulatory authority that demonstrates that the disposal facility is operational and fully capable and ready to receive and permanently dispose of the waste for CLIN(s) proposed by the date of contract award. DOE anticipates contract award in June 2012.

If such documentation from the appropriate regulatory authority has not been issued at the time of proposal submission, the Offeror must provide a detailed plan, which identifies activities yet to be completed, requirements not yet met, copies of any permits obtained at the time of proposal submission, and includes a schedule (with critical path identified), including schedule for regulatory approval. When the documentation is issued by the appropriate regulatory authority, the Offeror shall provide such to the Contracting Officer immediately upon receipt by the Offeror. Submission of such documentation does not constitute discussions or a request for a revised proposal pursuant to Section L, FAR 52-215-1 entitled “Instructions to Offerors – Competitive Acquisition” and FAR 15.001.

Offerors shall describe in sufficient detail the disposal capacity of the facility, description of how the waste for CLIN(s) proposed will be disposed, including from the time of receipt at the facility to permanently dispose. This will include a description of the Offerors ability to receive, handle and dispose of the waste (e.g., by rail, intermodal or truck) for the CLIN(s) proposed.

**(3) Criterion 3 – Past Performance**

The Offeror shall submit relevant past performance information for the Offeror, any major subcontractors and if a joint venture or newly formed entity, each member, in performing relevant work completed within the last five (5) years or currently ongoing

which is similar in size, scope and complexity to that described in the PWS will be evaluated.

The Offeror may include contracts similar in size, scope, and complexity to this requirement using information that is readily available to DOE, either furnished by the Offeror's customers and/or information obtained from other sources. The Offerors are advised that DOE may query available Government databases, Government and Commercial references submitted by the Offeror, and questionnaires received from references sent to those references by the Offeror. Other sources may include, but are not limited to, interviews with technical personnel, Contracting Officers and other available data.

A written Past Performance Reference Information Form, Section L, Attachment L-1, for three (3) contracts similar in size, scope and complexity to the work described in the PWS which have been completed or are in progress during the past five (5) years for the Offeror as well as for each member of joint ventures, LLC, or other teaming arrangement newly formed for purposes of performing this contract, if any. A written Past Performance Reference Information Form, Section L, Attachment L-1 shall also be submitted for one (1) contract for each major subcontractor that is similar in size, scope and complexity to the work described in the PWS which has been completed or is in progress during the past five (5) years. The Offeror shall identify the portion of the work (size, scope, and complexity) performed by the entity specified in the form. Contract work for State and local Government, private sector clients, and subcontracts that are similar to the work described in the PWS will be evaluated equally with similar Federal contracts.

The Offeror shall provide the Past Performance Questionnaire, Section L, Attachment L-2, to each of the clients named on Attachment L-1. The Offeror shall require that the clients return the Past Performance Questionnaire directly to the address identified on Attachment L-2 no later than six (6) weeks after issuance of this solicitation.

In the case of an Offeror without a record of relevant past performance or for whom information on past performance is not available, the Offeror will not be evaluated favorably or unfavorably.
