

United States Department of Energy
Synopsis
Los Alamos Legacy Cleanup Contract (LLCC) Procurement
DE-SOL-0008109

This notice is considered to be a synopsis in accordance with FAR Subpart 5.2 for the Los Alamos Legacy Cleanup Contract (LLCC) procurement.

On May 26, 2016, the U.S. Department of Energy (DOE), Office of Environmental Management, issued a Draft Request for Proposal (RFP) for legacy cleanup services at Los Alamos National Laboratory. The Pre-Solicitation Conference and Site Tour were held June 7-9, 2016. The Final RFP is anticipated to be released on or near August 25, 2016, and will also be posted to the FedConnect website at: www.fedconnect.net and at FedBizOpps at www.fbo.gov.

The objectives of the LLCC acquisition include the following: protect, characterize, and monitor the regional aquifer; clean up contaminated media and contaminated legacy waste sites at LANL and surrounding private- and Government-owned lands (formerly LANL), including groundwater and surface water, to levels appropriate for the intended land use; decontamination and decommissioning and demolish inactive, process-contaminated, and non-contaminated facilities that impede the timely execution of environmental restoration activities; retrieve, characterize, and prepare legacy mixed-low level radioactive waste and transuranic waste for shipment off-site (the LANL EM Program manages the disposition of legacy waste generated between 1970 and 1998 and NNSA is responsible for newly generated waste (waste generated after FY1998)); and transfer sites to the landlord organization (NNSA) for long-term surveillance and monitoring as needed, in order to provide necessary safeguards and protection of workers, the public, and the environment, or to subsequently transfer to the County of Los Alamos.

The Government anticipates awarding a performance based contract that includes Cost-Plus-Award-Fee (CPAF), Cost Reimbursable, and Indefinite-Delivery, Indefinite-Quantity (IDIQ) type Contract Line Items (CLINs). The expected total period of performance is ten years, including option years. This procurement will be full and open competition. The North American Industrial Classification System (NAICS) code for this effort is 562910, Remediation Services (Environmental Exception) with a size standard of 750 employees. The Government does not intend to acquire a commercial item or service using FAR Part 12.

The contract award resulting from the Final RFP is expected to be in or about the second quarter of Government fiscal year 2017 if awarded without discussions, and expected to be in or about the third quarter of Government fiscal year 2017 if awarded with discussions.

A dedicated webpage has been established for this procurement. All news/announcements, documents (including the Final RFP), questions/answers, and related links will be posted to the following webpage: <https://www.emcbc.doe.gov/SEB/LLCC/>. Interested parties are encouraged to continue to monitor the procurement website for updates.

Contracting Office Address:

U.S. Department of Energy
Environmental Management Consolidated Business Center (EMCBC)
250 E. 5th Street, Suite 500

Cincinnati, OH 45202

Place of Performance:

All functions under this contract will be performed at or near the Los Alamos National Laboratory located near Los Alamos, NM.
