- For Attachment J-1 *Specifications* Section 23 31 13 Insulated Fan Stack, the stack is not required to be listed under UL 2221, the inner liner is 10 ga. stainless steel, and the outer shell is 304 stainless steel.

- For Attachment J-2 *Drawings* number E941002-F-0016, the reference to MCC-A should be MCC-C, and the reference to MCC-C should be MCC-A.

For logistical reasons, these changes will be addressed in a post-award modification(s) to Section J Attachment J-1 *Specifications* and Attachment J-2 *Drawings*.

Based on the foregoing, it was determined that an amendment to the Section L Attachment L-10 *Assumptions* notifying the offerors would be the most effective and efficient manner in resolving this issue. See the amended Section L Attachment L-10 *Assumptions* for the specific language and the basis for which offerors are to propose with respect to the issues identified above.

1. Revise M.6 *Evaluation Factor – Price* paragraph (a) by adding the words "...fair and reasonable..." to better sync with FAR Part 15 and Section L language.
2. Revise M.6 *Evaluation Factor – Price* paragraph (d) by adding language indicating that if the Government conducts a realism analysis and concludes the offered price to be unrealistic, the Government may determine the offer is unacceptable.
