Ms. Marcia Fultz, Contracting Officer
U.S. Department of Energy
Portsmouth/Paducah Project Office
1017 Majestic Drive, Suite 200
Lexington, KY 40513

Dear Ms. Fultz:

**Task Order DE-DT0007774: Fluor Federal Services, Inc., Paducah Deactivation Project
Deliverable 83—Annual Site Facility Occupational Status Report**

Enclosed please find the subject deliverable.

If you have questions, please contact Craig Willett at (270) 441-6144.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph Poniowski".

Joseph Poniowski
Director, Prime Contract Management

Annual Site Facility Occupational Status Report January 2016

The U.S. Department of Energy (DOE) Request for Task Proposal under Performance Work Statement (PWS) element C.1.4.1, "Surveillance and Maintenance," requires the submittal of an Annual Site Facility Occupational Status Report. The 2016 Site Facility Occupational Status Report has been created using information from the FIMS database. The facilities have been grouped into five reports based on the occupancy status of the facility. These categories are Occupied Facilities, Buildings Not Designed for Occupancy, Systems/Structures Not Designed for Occupancy, Facilities with Occupancy to Be Determined, and Facilities Awaiting Decontamination and Decommissioning. The following are the report groupings and descriptions of each.

Occupied Facilities (Attachment 1)

The facilities in this group are the primary buildings on-site. The majority of these buildings have DOE contract/subcontract personnel in them every day. Some facilities are administrative in nature – offices, conference rooms, and training rooms. Others are buildings where craft workers report to work and return for breaks and change-out. Additionally, some buildings may have multiple facility numbers due to additions made to the original structure. All facility numbers associated with a single occupied building have been included in this report.

Buildings Not Designed for Occupancy (Attachment 2)

The buildings included in this report are facilities whose designed function does not require and/or support continuous occupation. This group includes storage buildings, pump houses, valve enclosures, switch houses, guard portals, etc. The majority is operational or could be used for the site mission. In general, these facilities have personnel working in them regularly.

Systems/Structures Not Designed for Occupancy (Attachment 3)

The facilities listed in this report include systems that have been assigned a facility number, such as the sanitary water system and the power system. This group also includes structures that are not considered buildings such as parking lots, storage pads, tanks, cooling towers, lagoons, lift stations, switchyards, tunnels, and tie lines. Monitoring wells have not been included in the report.

Facilities with Occupancy To Be Determined (Attachment 4)

Facilities in this group currently are unoccupied; however, they may be used in the future if in suitable condition.

Facilities Awaiting Decontamination and Decommissioning (Attachment 5)

Facilities on this report are in the process of or awaiting demolition.
