NOTES:
1. AM-1 is a programmable relay consisting of several discrete inputs and outputs and is shown in multiple locations for drawing clarity. It is programmed according to the sequence of operations.
2. See V-105775 for additional stack sampling system details.

ABBREVIATIONS:
- BLC: Blower
- CN: Check valve
- FC: Flow control valve
- FGC: Flow-generating controller
- FM: Flow meter
- HM: Hole meter
- IC: Isolated control valve
- PC: Pneumatic controller
- PV: Pressure
- V: Valve
- VCD: Voltage to current transducer
