Special Notice – Modification to the Tank Waste Cleanup Contract and Request for Proposal Release Time Frames for the Central Plateau Cleanup Contract, Tank Closure Contract and the EM Nevada Environmental Cleanup Contract

December 31, 2018

In January of 2018, DOE announced its acquisitions for the Post 2018 Hanford Work. The Office of Environmental Management (EM) is making a change to the previously announced Tank Waste Cleanup Contract (TWCC). The TWCC has been split into two separate acquisitions. The initial acquisition will be for the Tank Closure Contract (TCC) utilizing the End State Contract Model announced in the Special Notice - Modification to End State Contracting Model, posted on December 12, 2018. The TCC will be focused on tank closure and feed delivery to the Waste Treatment and Immobilization Plant (WTP). The second acquisition to be covered in a future acquisition will be focused on the WTP operations and maintenance.

It is DOE's intention to release the Final Requests for Proposals for the following procurements in the second quarter of FY 2019 in the general order listed below:

- 1.) Hanford Central Plateau Cleanup Contract (CPCC)
- 2.) Hanford Tank Closure Contract (TCC)
- 3.) Hanford 222-S Laboratory (222-S)
- 4.) EM Nevada Environmental Program Services (EPS)
- 5.) Savannah River Site Paramilitary Security Services
