SEP 30 2010

Mr. James W. French
President and Project Manager
Savannah River Remediation, LLC
Bldg 766-H, Room 2407
Savannah River Site
Aiken, SC 29808

Dear Mr. French:

It is a pleasure to inform you that Savannah River Remediation, LLC (SRR) at the DOE Savannah River site has successfully demonstrated compliance of its Earned Value Management System (EVMS). You are hereby presented with this letter attesting to Certification of your EVMS.

This certification is based upon DOE's Office of Engineering & Construction Management (OECM) compliance analysis of the SRR EVMS as implemented, and as demonstrated at our OECM's on-site review conducted April 19 – 23, 2010, and subsequent implementation of corrective actions by SRR. Compliance of the SRR EVMS is as specified by the American National Standards Institute/Electronic Industries Alliance 748 Standard (ANSI 748). DOE's certification requires application and maintenance of continuing compliance per ANSI 748 across all SRR capital asset projects as executed under DOE Order 413.3.

DOE expects SRR to maintain compliance through annual surveillance reviews and submittal of resulting report(s) directly to OECM. During the SRR contract with DOE, OECM may perform its own surveillance review(s). Recognizing that management systems are dynamic and to help ensure SRR EVMS effectiveness, I encourage continuous improvement by SRR as long as compliance remains per ANSI 748. SRR shall promptly notify OECM in writing of any such changes.

DOE congratulates you on this certification. You have achieved a significant milestone by demonstrating a performance measurement system that provides valid data and is effective in managing project performance.

Sincerely,

A handwritten signature in black ink that reads "PBosco".

Paul Bosco
Director, OECM
