### **SAVANNAH RIVER SITE INTEGRATED MISSION COMPLETION CONTRACT – DRAFT REQUEST FOR PROPOSAL SECTIONS B, C, H, L, M AND SECTION J - TASK ORDERS POSTING**

The Department of Energy (DOE) is releasing Draft Request for Proposal (RFP) Sections B, C, H, L, M and Section J - Task Orders (TOs), under Solicitation No. 89303319REM000055, pertaining to the Savannah River Site (SRS) Integrated Mission Completing Contract (IMCC) procurement for review. The Draft RFP Sections B, C, H, L, M and Section J - Task Orders (TOs) are being issued for informational purposes to assist the Department of Energy (DOE) in developing a Final RFP for this procurement.

DOE IS NOT REQUESTING PROPOSALS AT THIS TIME AND INTERESTED PARTIES SHALL NOT SUBMIT PROPOSALS IN RESPONSE TO THE DRAFT RFP SECTIONS B, C, H, L, M AND SECTION J - TASK ORDERS. DOE WILL NOT EVALUATE ANY PROPOSALS RECEIVED IN RESPONSE TO THE DRAFT RFP SECTIONS. PROPOSALS SHALL BE SUBMITTED ONLY IN RESPONSE TO THE FINAL RFP, WHICH IS CURRENTLY ANTICIPATED TO BE ISSUED IN SEPTEMBER 2020.

DOE hereby invites all interested parties to thoroughly examine the Draft RFP Sections B, C, H, L, M and Section J - TOs and the procurement website (<https://www.emcbc.doe.gov/SEB/SRSIMC/>) in their entirety. Please submit comments in writing to the following email address: [SRSIMC@emcbc.doe.gov](mailto:SRSIMC@emcbc.doe.gov). The Draft RFP Sections B, C, H, L, M and Section J - Task Orders are subject to change in the development of the Final RFP as a result of the DOE's consideration of the comments received from interested parties in response to the Draft RFP Sections B, C, H, L, M and Section J - TOs.

Consistent with the EM End State Contracting Model (ESCM), the SRS IMCC RFP contemplates an Indefinite Delivery Indefinite Quantity (IDIQ) contract under which Cost Reimbursement (CR) and/or Fixed Price (FP) task orders may be issued. The contract ordering period will be 10 years, including a 90-day transition period. The contract is estimated to be worth up to approximately \$21 billion over the ten-year ordering period, which includes the issuance of task orders that shall not exceed five years beyond the end of the contract ordering period. EM's ESCM employs a two-step process using a competitive qualifications-based RFP

for selection of the Offeror representing the best value to the Government, and subsequent post-award negotiations of discrete scopes of work through effective partnering on a task order basis. EM is pursuing a streamlined selection process under this ESCM whereby a best value selection process will include three evaluation factors (key personnel, past performance, and management approach); along with a cost factor, that includes contract transition costs, key personnel costs, fully burdened labor rates, and fee. In particular, DOE is seeking feedback from interested parties on the following:

1. Are the Section H workforce transition and hiring clauses clear to potential Offerors? If not, what is unclear and/or how can these clauses be improved?
2. Is the Subcontracted Work clause in Section H clear?
3. Although the Section J Draft Requests for Task Order Proposals (RTPs) for the Implementation Period and one-year of Liquid Waste Operations will not be evaluated under the streamlined source selection procedure for the SRS IMCC procurement, DOE is interested in any questions, concerns or input for post contract award consideration.
4. Are the page limitations included in the Draft RFP Section L for the Technical and Management Proposal (Volume II) sufficient? If not, please provide input.
5. Are there any additional specific technical or programmatic documents and/or information that you think would be helpful and should be posted to the EMCBC Acquisition website's documents library in order to assist in preparation of proposals?
6. The March 14, 2020 Special Notice indicates a 45-day proposal preparation period once the Final RFP is released. Is 45 days sufficient?
7. Due to the current situation, DOE is considering the possibility of holding oral presentations and PM interviews virtually instead of in-person. Do you have any thoughts or suggestions regarding this approach?
8. Do you have any additional suggestions?

Interested parties will have until May 28, 2020 to submit comments regarding the Draft RFP Sections B, C, H, L, M and Section J - TOs. All comments shall be submitted in the Microsoft Excel format provided on the procurement website, and separated by RFP section. Please do not make any changes to the Microsoft Excel formatting with the exception of adding rows as needed. DOE will not respond to or post on the procurement website, any verbal or written questions or comments pertaining to the Draft RFP Sections B, C, H, L, M and Section J - TOs; however, DOE will consider comments when preparing the Final RFP. Interested parties will be given the opportunity to submit questions and comments in writing for DOE response once the Final RFP is issued.

The goal of the ESCM and the master IDIQ SRS IMCC is to achieve measurable results toward completion of the DOE-EM mission at the SRS, by accomplishing the maximum amount of

environmental cleanup within the 10-year ordering period at the best value to the U.S. taxpayer. It is DOE's expectation and a fundamental premise of the ESCM that DOE will partner with the contractor after award to openly negotiate Task Orders that provide the most reduction of environmental risk and EM financial liability to advance the Savannah River Site's cleanup status as far as is reasonably achievable toward the ultimate completion of the SRS cleanup mission.

Sincerely,

A handwritten signature in black ink that reads "Jodi Gordon". The signature is written in a cursive, flowing style.

Jodi Gordon  
Contracting Officer
